

Most Impossible Card Game

This little card challenge will keep some kids busy for quite some time.

Equipment Needed: Deck of cards

How to play:

All you need is a single deck of cards. The objective is to get through the deck of cards without saying and turning over the same card.

That might sound strange, but it really is very simple. Shuffle the deck well. To start the game, turn over the top card and say, "Ace." If you turn up an Ace, you're beat already. If you turn up anything but an ace, you may continue.

Turn over the second card and say, "Two." If you turn up a two, you're beat already, but if you turn over any card except the two, you can go on.

The pattern continues with all the cards in order and then repeating the order again. Remember if you call a card and it turns up at the same time, you're out.
